Regular TARN training courses are held at locations in Manchester and London. Due to the different mix of delegates that has attended TARN courses over the past few years and following feedback from users, the TARN courses have been changed for 2018.

- The **Foundation course** is aimed solely at those who are new to TARN. This course will provide all the basic information that is required to begin the data collection process.
- The **Reporting & Refresher course** includes a morning data entry refresher session and an afternoon report focussed session; delegates will be welcome to attend one or both sessions.

The courses are **free of charge** to all participating Trusts.

Which course should I attend?

- **Foundation course:** if you are new to TARN and involved in data entry &/or identifying cases.
- **Reporting & Refresher course:** if you have previously attended a Data collection or Foundation course; if you have been involved in TARN data entry for some time; you use the TARN data &/or reports but do not enter data
